Estimated Fee Budget: \$400,000

Background: The City of Tampa's Water Department treats surface water from its Hillsborough River Reservoir and delivers quality drinking water to a service population of approximately 590,000 people in the Hillsborough County area. The potable water service area encompasses 211 square miles and treated water is pumped through a transmission and distribution system consisting of over 2,200 miles of pipe ranging in size from 2-inch to 48-inch diameter. The City of Tampa Water Department's mission is to provide superior drinking water and reclaimed water services to its customers. The previous Master Plan developed in 2009 needs to be updated and enhanced in order to accomplish this critical mission. Water Department needs to plan its infrastructure rehabilitation, replacement, expansion, and upgrades appropriately and manage its system effectively. The Potable Water Master Plan will be the key component and framework with which the Water Department will successfully meet the future demands on its system. The objective for the Potable Water Master Plan is to plan for a reliable and redundant potable water system with adequate capacity that provides high quality water accommodating future growth.
