16-C-00026; San Carlos Pumping Station Rehabilitation Design-Build

Public Announcement In Compliance With Requirements Of Chapter 287.055, Laws Of Florida, Consultants Competitive Negotiation Act, As Amended, The City Of Tampa's Equal Business Opportunity Program, City of Tampa Code Chapter 2, Article V, Division 3, Section 2-282, and Applicable Federal Law. Submitters will be Notified of Intent To Award by E-mail.

RFQ for Contract 16-C-00026 - The City of Tampa Wastewater Department desires to obtain Design-Build Services to complete the rehabilitation of the San Carlos Pumping Station located at 4406 San Carlos Street.

Services will be provided under a contract with negotiated fixed fees for assessment of rehabilitation needs, selection and evaluation of design alternatives, final design, permitting, project management, overhead, profit, and a guaranteed maximum price with appropriate surety bonds. Services will also include, but not limited to, engineering investigations, site planning, cost estimating, advertising and administration of subcontracts, start-up, O&M manuals, training, and all related work required for a complete project.

Background: The San Carlos pumping station was placed into service in 1981. Several of the station's components are original and have reached the end of their useful life. The station currently uses (3) pumps. Pump #1 and Pump #3 are variable speed pumps rated at 37,000 gpm (1500 hp). Each of these pumps are controlled by a medium voltage eddy current clutch system. Pump #2 is a variable speed pump rated at 13,400 gpm (250 hp). This pump is controlled by a variable frequency drive. The station discharges through a force main consisting of 48" pipe that connects directly to the Howard F. Curren AWTP.

The station rehabilitation shall include, but is not limited to the following: replacement of all pumps, motors, pump discharge valves, electrical and control components, flow meters, other equipment needed to restore station reliability and provide improved operation, building and other improvements needed to accommodate and provide suitable environment for selected equipment. Pump selection and pumping strategy shall provide station capacity to meet peak wet weather flows of 38,000 gpm (55 MGD) and the daily flow requirements. The pump selection and pumping strategy shall be designed to maximize energy efficiency using variable speed control. The rehabilitation shall also include architectural updates to the existing building so that the building exterior is modernized and enhances the neighborhood. The station is located in a residential area and there has been a history of complaints associated with station odors and concerns from the neighborhood during other construction projects. Specialized design and construction approaches shall be developed to minimize and mitigate disruption to the area during the rehabilitation and so that wastewater flow is maintained throughout all phases of the construction.

The scope of the design-build contract will include:

1. Assessment of equipment replacement needs.
2. Development and analysis of alternatives for pumping strategy, equipment selection and layout, construction sequencing, methods to minimize disruption during construction, and associated cost estimates
3. Complete design of selected alternative including phasing
4. Construction of selected alternative
5. Public Relationship activities needed to maintain a positive response to the project from affected neighborhoods

Estimated Construction Budget: \$9,000,000.
Schedule: Design FY17 & FY18; Construction FY19.

A pre-submittal conference will be held at 3:00PM Monday, October 10, 2016, in the 3rd Floor City Council Chambers, Old City Hall 315 E. Kennedy Blvd., Tampa, Florida 33602. After the conference, a site visit will be conducted at the San Carlos Pumping Station. Attendance is not mandatory.
